# AMPIO touch panels

## PANEL CREATOR

Design your own panel in no time!

- Select an M-DOT panel model
- Choose the colour of the glass and the panel's edge style
- Choose icons from the available folders, or upload your own
- Decide, whether to add captions under the icons, or not
- Decide, whether to add frames around selected icons, or not
- Save your design to PDF

# Elegance and comfort

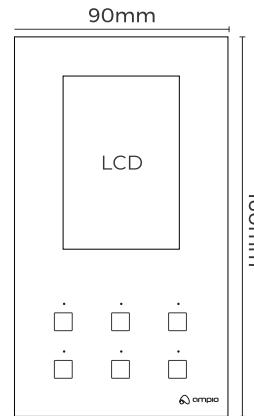

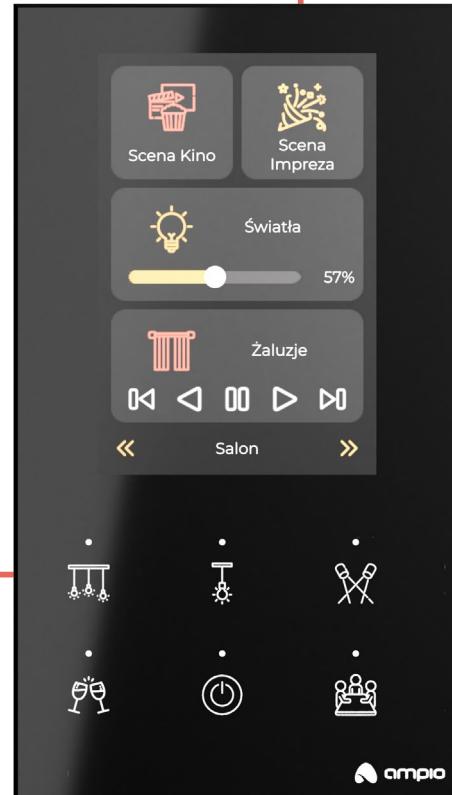

Using touch panels to navigate Ampio smart home functionalities is not only comfortable and reliable. The modern touch panels are made of the highest quality LACOBEL glass and are available in many colours and two shapes (square and rectangular), which makes them easy to incorporate into any kind of interior design. The personalisation option, on the other hand, makes it possible to design a very intuitive and user-friendly panel.

With their 18 programmable touch fields, Ampio touch panels can replace several traditional switches. Each touch field can execute multiple commands, as each interaction, e.g., single tap, long press, or double tap, can perform a different action.

## M-DOT-T6

– a next-generation smart panel

Modern design, intuitive operation and unparalleled configuration options – M-DOT-T6 is the first Ampio panel with a fully touchscreen display. It has been designed with flexibility, aesthetics and user comfort in mind.

- **FULLY TOUCHSCREEN DISPLAY**  
Up to 6 screens and as many as 20 widgets in one panel – everything under your control.
- **WIDE RANGE OF WIDGET OPTIONS**  
From simple switches to advanced temperature controllers.
- **INTUITIVE OPERATION**  
Effortless configuration – edit, move, change.
- **FULL CUSTOMISATION**  
Freely change colours, widget layout and interaction methods.
- **LIGHT AND DARK THEMES**  
Dynamically change the appearance of the panel throughout the day.
- **RGB COLOURS**  
Full colour palette for visualising device statuses.
- **CUSTOM ICONS**  
Add your own icons for a cohesive design.
- **GLASS COLOUR**  
The panel is available in many colours – match it to your interior.
